For immediate release.

Ashlar-Vellum™ Announces Graphite™ v12

September 24, 2018, Austin, TX. Ashlar-Vellum announces the development and upcoming release of Graphite version 12, their 3D wireframe CAD software on Mac and Windows.

The following enhancements are anticipated in Graphite v12:

- 2 to 25 times faster on zooms, pans and selects, the things users do most.
- Further improvements to DXF/DWG imports/exports.
- Miscellaneous bug fixes and enhancements.
- Support for the most current operating systems for Mac & Windows.

Final release is anticipated after the first of the year. With a manufacturer's suggest retail price for US \$145 for the upgrade from Graphite v11 to v12, Ashlar-Vellum is offering pre-release discounts. Upgrades from Graphite v8, v9 and v10 are also available. See our website for details. Those purchasing during pre-release are eligible for both v11 and v12.

Robert Bou, Ashlar-Vellum's president, commented, "This upgrade will offer a significant return on investment for those serious about getting their work done. We have significant speed increases, particularly apparent on the largest drawings, and we're facilitating better workflow, with many little niceties that smooth the annoying bumps out of the drawing process."

About Ashlar-Vellum

Founded in 1988, Ashlar-Vellum is the leading provider of precision CAD and 3D modeling software that automates and simplifies the design process for drafting, design, and engineering professionals on both Macintosh and Windows platforms. Ashlar-Vellum's unique Organic Workflow™ featuring their renowned Vellum® user interface and powerful toolsets have earned the loyalty of innovators around the world. Ashlar-Vellum operates from its headquarters in Austin, Texas. To learn more call +1 800-877-2745 or visit www.ashlar.com.
